

PROFESSIONAL SUMMARY

Senior Engineer with 5+ years shipping production systems across **consumer lending, insurance, banking, fintech and — currently — energy**. Full-stack builder and platform engineer: FastAPI/Node.js microservices, event-driven pipelines (Celery, RabbitMQ), and Terraform-managed AWS with an **Akamai security shield**. GenAI practitioner — **LangChain pipelines, RAG, and agentic AI workflows** (Hermes) that automate real business processes. Owned an end-to-end LOS–LMS integration supporting a ₹200 crore loan book and saving 1,500+ monthly employee-hours; cut insurance quote turnaround from 8 days to near-instantaneous.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, Node.js, Golang, SQL	Backend	FastAPI, Flask, Express.js, REST APIs, WebSockets, Microservices
Frontend	Angular, Next.js, React, Tailwind CSS	GenAI & Agents	LangChain, OpenAI, RAG, Prompt Engineering, Agentic AI (Hermes), LLM Apps
Data & Messaging	PostgreSQL, MongoDB, Redis, Celery, RabbitMQ, Async Workers	Cloud & DevOps	AWS (EC2, Lambda, S3, RDS, IAM, VPC, API Gateway, CloudFront, Route 53, WAF), Terraform, Docker, Kubernetes, GitHub Actions, Jenkins, Nginx, Akamai
Practices	System Design, Event-Driven Architecture, SOLID, TDD, CI/CD, Security Hardening, Code Review, Mentoring	Certifications	Microsoft Azure Fundamentals (AZ-900)

WORK EXPERIENCE

Senior Engineer · Go Digital	Apr 2026 — Present
Energy sector · Mumbai, India	
- Hardening platform and GenAI infrastructure for the energy sector: refactored a production FastAPI backend to best practices, resolving long-standing issues across the Angular frontend — improving maintainability and shipping velocity. - Managed architecture-level AWS infrastructure with Terraform across production, QA, sandbox and development environments; configured API Gateway integrations and unblocked Lambda layer builds for AI model loading in GitHub Actions CI/CD. - Implemented a company-wide security shield with Akamai over the AWS estate — WAF, DDoS and edge policies managed as code with Terraform. - Building GenAI tooling — LangChain pipelines and agentic workflows — alongside core platform work.	
Full Stack Developer · Western Capital Advisors (Lending NBFC)	Feb 2025 — Apr 2026
Mumbai, India	
- Led the end-to-end LOS–LMS integration (FastAPI, Flask, Node.js, Angular) — automating customer deduplication, disbursement and payment flows; saved 1,500+ monthly employee-hours, supported growth to a ₹200 crore loan book. - Designed event-driven payment reconciliation — Razorpay webhook receiver on AWS Lambda syncing disbursements and repayments; eliminated manual entry and reconciliation gaps.	

- › Deployed a real-time analytics platform (Apache Superset, Docker Compose, Redis, PostgreSQL, Celery) serving 100+ employees over SSL-secured Nginx.
- › Automated MongoDB → PostgreSQL ETL into a unified data mart for consistent BI and regulatory reporting.
- › Conducted **25+ technical interviews** and built a core engineering team of three, owning the hiring bar for backend engineers.

Associate Consultant · [Datacurate Technologies](#)

Jun 2022 — Feb 2025

Clients: HDFC ERGO General Insurance · Kotak Life Insurance · Mumbai, India

- › Designed smart **quote-to-policy systems** (Flask, Node.js/Express) cutting turnaround from **8 business days to near-instantaneous**, unlocking same-session conversions (HDFC ERGO).
- › Fixed 8 critical security vulnerabilities in production; introduced unit/integration testing and refactored legacy services along SOLID principles; drove the Flask → Next.js migration plan.
- › Built an **OCR-based pipeline** extracting data from competitor policy PDFs (computer-generated to scanned) enabling data-driven premium pricing.
- › Optimized ETL pipelines for complex data marts (+30% efficiency) and built a parallel-processing wrapper that cut data load times by **50%** (Kotak Life).

Flutter Developer Intern · [IAHV \(Art of Living\)](#)

Aug 2020 — Mar 2021

Mumbai, India

- › Led a team of 12 building a Flutter + Node.js + Firebase mobile app for hierarchical management of **watershed projects across Maharashtra**; delivered a Google-Drive-style document manager used by field teams.

PROJECTS

GSTMind — GST Invoice Processing SaaS

gstmind.qzz.io

- › Architected a full-stack SaaS on FastAPI microservices (auth, API gateway, CMS, async workers) automating GST invoice processing — cutting manual accounting work by **90%** for SMEs and enterprises.
- › Designed a **model-agnostic AI Worker** on Celery supporting API-based and self-hosted models for data extraction; Jenkins CI/CD shipping Docker images to EC2 behind Nginx, MinIO for S3-compatible storage.

NSE Breakout Scanner & Backtesting Engine

Private

- › Automated scanner surfacing NSE breakout signals into structured CSVs, paired with a **cost-aware backtesting engine** (STT, brokerage, slippage) validating BTST and swing setups before capital is deployed.
- › **Agentic AI research loop (Hermes)** runs nightly cost-aware walk-forward runs across strategy configurations — archiving every run and promoting the strongest setups into a curated best-of set.

Advanced Authentication Microservice

github.com/rushilshah23/Authentication-system

- › Production-grade FastAPI auth microservice — email + social login (Google, GitHub) with JWT access/refresh tokens; deployed on **Kubernetes** with auto-scaling and persistent PostgreSQL for high availability under variable load.

EDUCATION & ACHIEVEMENTS

B.E., Information Technology

2018 — 2022

Mumbai University · CGPA 8.93/10

- › **Winner, Mumbai Hackathon 2022** (FOSS United / Zerodha / Frappe circle)
- › Microsoft Certified: **Azure Fundamentals (AZ-900)**
